

**TITAN**

**ZEUS TITAN**

**Next-generation scalable DVR platform to power your entire school bus video & fleet management system**

- 16** crystal clear video channels allow you to scale your system as needed
- The most technology** ever crammed into a small footprint DVR, to make install easy
- Never pay for another drive again,** with 2TB or 4TB Infinity Drives that are guaranteed for life
- Have peace-of-mind with E-Guard:** Allowing you to capture events after a power failure
- 4K** Don't miss a detail, with 4K & 1080p HD support on all channels
- Real-time WiFi/BT/4G/LTE/OBDII** connection capability baked-in
- TITAN's AI core** enables the integration of cross-platform features not limited to video. It allows for one central communications portal for video, tracking and retrieval of real time and historical vehicle performance data.

**OMNIVIEW**  
360°

**OmniView 360° Camera**

**See into every seat of your bus with high-definition coverage and 3 streams per camera with TruView**

- HD 1080p** Don't miss a detail, with HD 1080p-equivalent images at any angle
- Greater coverage,** with the ability to look down into seats
- Hear every detail,** with best in class sound quality
- See clearly at all times,** with NightVision low-light system
- Low-profile, tamper-proof design** (3/4" protrusion) means flexible mounting without obstruction

**DVRVIEWER**  
PRO

**DVR VIEWER PRO**

**Video playback made easy and secure to protect the privacy of students & staff**

- The fastest video clip export** in a DVR review software
- GPS map syncing,** so you can see where and when events occurred
- Blur tool to protect identity** and privacy, zoom tool to see more
- Heads up display overlay** to capture key data including speed, date, and time
- Easy to use timeline and calendar** interface to quickly find the video you need
- Cloud driven,** map and event based intuitive video search
- Backwards compatible** to work with all 247 DVR systems and previously saved .DVR files

**INFINITY**  
DRIVE

**Infinity Drive**

**Next-generation Dual-stage Hybrid Drive (DHD) that eliminates vibrations & file corruption issues**

- Massive 2TB capacity** means never worrying about running out of storage space
- Built rugged,** for reliable performance under the harshest conditions
- Powered by Dual-Stage Hybrid Drive Technology** for the best of HDD and SSD all in one device
- Direct USB connectivity,** without needing a docking station
- Lifetime warranty** means worry free replacement for the life of the drive
- Backwards compatible** to work with all Zeus DVR systems

**SACS**

**Exterior Stop-Arm Cameras**

**Reduce stop-arm violations by capturing video & photo record of every incident**

- HD 1080p** Don't miss a detail, with HD 1080p resolution. See the smallest details, while optimizing file size
- Violation reports** provide critical data and images for a fast, actionable incident-reporting program
- Day or night recording,** for capturing license plates in the dark (1 lux), even on vehicles traveling 75mph/100ft away
- Built rugged,** with an all-metal enclosure to handle whatever you throw at it
- Smart Detection feature** helps reduce false flags by differentiating between vehicles and other objects such as pedestrians

**TOUCHDOWN**  
CLOUD

**TOUCHDOWN Cloud**

**Manage video wirelessly to focus on your fleet & safety of your students**

- Wireless management** solution by never needing to pull a hard drive again
- Ability to access and manage DVR remotely** to see into the bus and download video quickly
- Cloud based** solution that requires no on-site server to manage
- Daily health check** on all video systems to make your life easier
- Remote monitoring** by 247 Support 365 days a year
- All required video stored securely** in the cloud, available through multi user access anywhere and anytime
