DVRVIEWER

.DVR Secure Video File Format

Easy Video
Playback and Review

Our DVRViewer playback software takes the guess work out of accessing your video. Reviewing footage has never been easier, or more secure. All video is recorded in a proprietary .DVR file format; protecting the privacy of your students and staff.

DVRViewer software is provided to you at NO additional cost. You have as many usage licenses as needed for your district.

Easily save custom clips in protected .DVR file format or AVI and MP4

GPS map syncing with MiniTrack, so you can see where events occured

Blur tool to protect identity and privacy of passengers

Heads up display overlay to capture key data including speed, date, and time

Easy to use timeline and calendar interface to quickly find the video you need

Customizable screen layouts, for optimal viewing plus digital zoom

OMNIVIEW30° with TRUVIEW

TruView Middle View

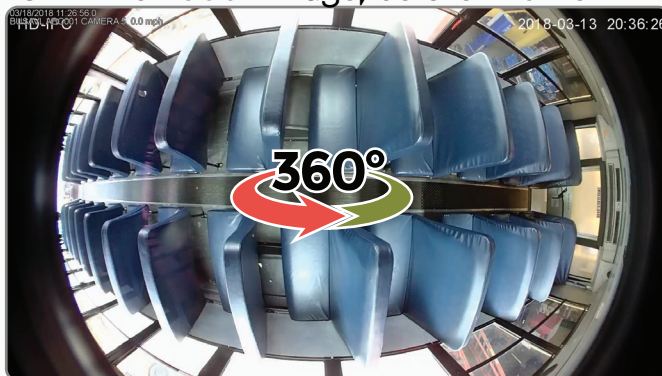

TruView Front View

TruView Back View

DVRViewer has built-in support for OmniView360˚ cameras. TruView feature takes the areas of interest and de-curves the scene into a distortion-free, natural image, that makes it easier for users to see and interpret events. With TruView, you get clearer images with the additional benefit of greater coverage—all with one camera!

Standard 247 Camera View

Clear sharp images. Standard on all 247 Cameras. TruView images comparable to our standard cameras.

OmniView360˚ Image, before TruView

Even in its raw format, OmniView360˚ delivers a clear sharp view of virtually the entire bus

COMPARISON

Conventional 360˚ cameras are no match compared to 247's OmniView360˚

Sample of Typical 360˚ Camera

Typical 360˚ cameras have far fewer pixels and much more distortion
